THE WMUR GRANITE STATE POLL THE UNIVERSITY OF NEW HAMPSHIRE

February 15, 2011

ROMNEY EARLY FAVORITE IN 2012 NH PRESIDENTIAL PRIMARY

By: Andrew E. Smith, Ph.D.
UNH Survey Center
603-862-2226
www.unh.edu/survey-center

DURHAM, NH – Mitt Romney is the early frontrunner for the 2012 Republican nomination for President among New Hampshire Republicans. However, the great majority of voters are undecided about who they will eventually support.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Seven hundred fifty-seven (757) randomly selected New Hampshire adults were interviewed by telephone between January 28 and February 7, 2011. The margin of sampling error for the survey is +/- 3.5%. Included in the sample were 357 likely 2012 Republican Primary voters (margin of sampling error +/- 5.2%) and 259 likely 2012 Democratic Primary voters (margin of sampling error +/- 6.1%). Also, a subsample of 712 likely November 2012 general election voters was included (margin of sampling error +/- 3.7%).

Republican Primary

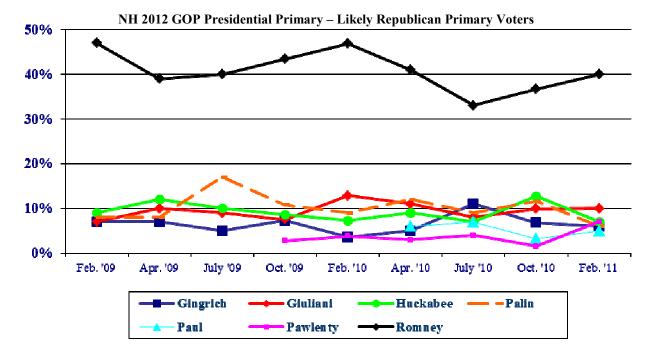

Although the First in the Nation New Hampshire Presidential Primary is a year away, prospective Republican candidates have already been spending time in New Hampshire introducing themselves to voters and testing their messages. The Granite State Poll has been monitoring voter sentiment about potential candidates since February 2009 in order to understand the dynamics of the New Hampshire campaign. But because primary elections are extremely volatile, any measure of voter preference this far in advance of the election are not indicative of the eventual outcome.

Among likely Republican Primary voters, former Massachusetts governor Mitt Romney, the 2008 New Hampshire runner-up, has consistently been the most popular and has garnered the most Republican support. In the most recent Granite State Poll, 40% of likely Republican Primary voters said they would vote for Romney, 10% would vote for former New York City Mayor Rudy Giuliani, 7% favor Minnesota governor Tim Pawlenty, 7% support former Arkansas governor Mike Huckabee, 6% prefer former Speaker of the House Newt Gingrich, 6% favor 2008 Vice Presidential candidate Sarah Palin, 5% support Texas Congressman and 2008 candidate Ron Paul, 3% support businessman Donald Trump, 1% favor former Pennsylvania Senator Rick Santorum, and 1% prefer Mississippi Governor Haley Barbour.

Romney has consistently led his potential Republicans since the UNH Survey Center began tracking in February, 2009 and has been above 35% throughout most of that period. "Romney is doing well in part because his brand of Republicanism fits with most New Hampshire Republicans, who can be characterized as 'Rockefeller Republicans'," said Andrew Smith, Director of the UNH Survey Center. "New Hampshire is one of the least religious states in the country and social conservatives have difficulty winning here. Fiscal issues are much more potent in the Granite State."

It is critical to point out that primary voters behave very differently than general election voters in that they do not have party cues to rely on, and almost all will vote for their party's eventual presidential candidate, no matter who that might be. Most primary voters do not settle on a choice until the very end of the campaign, so early poll numbers are a better gauge of a candidates popularity now than an indication of who voters will end up supporting. In the most recent poll, 78% of likely Republican primary voters say they are still trying to decide who they will eventually vote for in 2012, 15% are leaning toward a candidate, and only 7% say they have definitely decided who they will vote for.

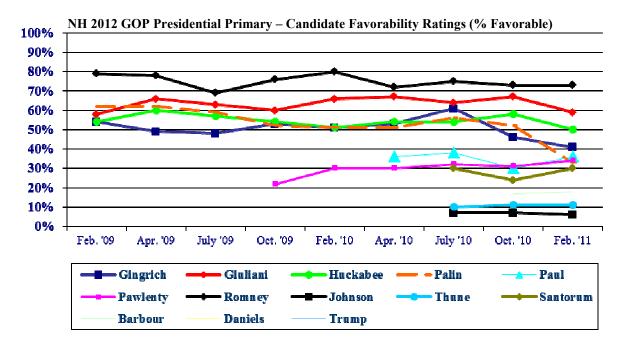

^{*} We ask that this copyrighted information be referred to as the Granite State Poll, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

Favorability Ratings

Support for Republican candidates is currently based almost exclusively on their name recognition and favorability ratings. Mitt Romney consistently has had the highest favorability ratings among all likely Republican candidates. Currently, 73% of likely Republican primary voters say they have a favorable opinion of Romney. Romney's net favorability rating, the percentage who have a favorable opinion of him minus the percentage who have an unfavorable opinion, is a very high +57%.

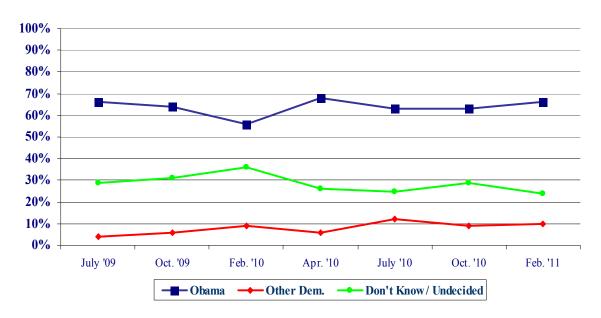

Rudy Giuliani is the second most popular Republican candidate with a net favorability rating of +30%, followed by Tim Pawlenty (+25%), Mike Huckabee (+22%), Rick Santorum (+18%), South Dakota Senator John Thune (+4%), Ron Paul (+1%), Newt Gingrich (+1%), The least popular Republicans are Haley Barbour (-1%), Mitch Daniels (-1%), former New Mexico Governor Gary Johnson (-5%), Sarah Palin (-17%), and Donald Trump (-43%).

A Democratic Primary?

While no Democrat has indicated that they plan to challenge President Barack Obama in 2012, his rather low job approval ratings may attract another Democrat, should they fall lower. When asked if they plan to vote for Obama in the 2012 New Hampshire Democratic primary, only 66% of likely New Hampshire Democratic Primary voters say they do plan to vote for Obama, 10% say they plan to vote for some other candidate, and 24% are undecided about what they will do.

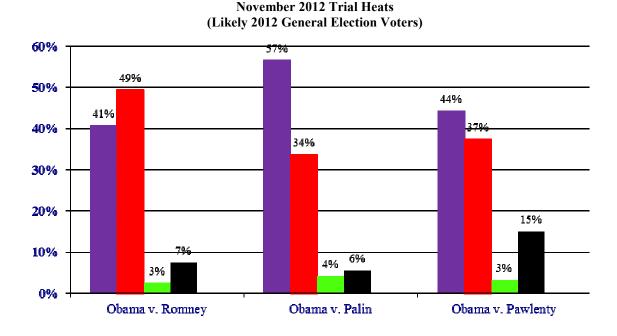

Vote for Obama or Other Democrat in 2012 Democratic Primary

2012 Presidential Election

Looking ahead to the 2012 general election, the likelihood of President Obama winning again in New Hampshire depends heavily on the Republican candidate he would face. In a hypothetical race between Obama and Mitt Romney, the current GOP primary favorite, Romney leads with 49% to 41% for Obama, 3% for some other candidate, and 7% are undecided. Obama does much better against 2008 GOP Vice Presidential candidate Sarah Palin. Obama leads Palin by a wide 57% to 34%, with 4% favoring some other candidate and 6% undecided. And when Obama is matched with Minnesota governor Tim Pawlenty, who has been campaigning in New Hampshire for several months, Obama holds a modest 44% to 37% lead with 3% favoring some other candidate and 15% undecided.

Romney leads largely because he does much better than either Palin or Pawlenty among independent voters. Romney leads Obama by 45% to 32% among political independents while Obama leads Pawlenty by 37% to 26% and Palin by 56% to 23%.
